

# Ecofin Global Renewables Infrastructure UCITS Fund (EGRIU)

As of 31 July 2022

Represents the aggregate rating of EGRIU's holdings as of 30/6/2022. Certain information ©2022 MSCI ESG Research LLC. Reproduced by permission; no further distribution permitted. See last page of the factsheet for additional information on the rating.

The Ecofin Global Renewables Infrastructure UCITS Fund (EGRIU) invests in listed companies that own, develop or operate renewable electricity technology plants and systems, and related infrastructure investments. EGRIU seeks to provide a measurable decarbonisation benefit by investing in companies riding on the high demand growth for clean electricity. The portfolio has a goal of generating long-term total returns through investment in sustainable initiatives in low-carbon power generation assets derived from a combination of capital appreciation and income over time.

## Impact

- Clear calculable impact in terms of CO<sub>2</sub> emissions avoided
- Effective displacement of carbon-emitting electricity generation by the cleaner generation of portfolio constituents
- The fund is 71.3% cleaner than the respective grids in which the underlying companies operate

\$1 million investment implies the **avoidance of 483 tonnes of carbon per year**

### Equivalent to the emissions from:

- 439 round-trip flights from New York to Los Angeles
- 60 car trips around the world

As of 30/6/2022. Source: Ecofin Advisors Limited

## Portfolio managers

### Michel Sznajer, CFA

Portfolio Manager

28 years investment experience

- Previously with Silvaris Capital Management, Wellington Management, Goldman Sachs and Bain & Company
- Brussel's University, MSc Business Engineering

### Matthew Breidert

Senior Portfolio Manager

28 years investment experience

- Previously with Millennium Partners, SG Barr Devlin and Cornerstone Energy Advisors
- University of Illinois-Urbana Champaign, BSc Ecology; Washington University, MBA

Total return includes dividends paid, if any, and reinvested. **The Ecofin Global Renewables Infrastructure UCITS Fund is a newly-launched fund which does not have a full calendar year of performance. Past performance is no guarantee of future returns.** Returns may increase or decrease due to currency fluctuations.

**Investment universe** (as of 30/6/2022)

Portfolio typically: 20-40 holdings

**Two stage process**

**Stage 1**

Filter global universe for owners of power generation and grids.

- Liquidity thresholds typically include a minimum of
  - \$200 million market cap
  - Average daily trading volume \$5 million

**Stage 2**

Filter initial universe for:

- CO<sub>2</sub> emissions
  - Computation of CO<sub>2</sub> emissions/MWh for each company and its local grid
  - Exclusion of companies whose emissions are not at least 10% better (i.e., lower) than local grid
- Electricity generation source
  - Stock by stock analysis of generation sources
  - Exclusion of all companies with over 30% of generation from coal.

**Portfolio exposure**

**By geography**

**By market cap.**

**Ten largest holdings (% of NAV)**

1. NextEra Energy Inc.	5.5%
2. NextEra Energy Partners	5.4%
3. Atlantica Yield	5.1%
4. Clearway Energy Inc.	5.0%
5. TransAlta Renewables	5.0%
6. ERG	4.8%
7. Acciona Energias Renovables	4.7%
8. Drax Group	4.7%
9. Edison International	4.2%
10. China Longyuan Power Group	3.9%

**Ten largest holdings 48.3%**

Due to rounding, totals may not equal 100%.

MSCI ESG Research LLC's ("MSCI ESG") Fund Metrics and Ratings (the "Information") provide environmental, social and governance data with respect to underlying securities within more than 31,000 multi-asset class Mutual Funds and ETFs globally. MSCI ESG is a Registered Investment Adviser under the Investment Advisers Act of 1940. MSCI ESG materials have not been submitted to, nor received approval from, the US SEC or any other regulatory body. None of the Information constitutes an offer to buy or sell, or a promotion or recommendation of, any security, financial instrument or product or trading strategy, nor should it be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. None of the Information can be used to determine which securities to buy or sell or when to buy or sell them. The Information is provided "as is" and the user of the Information assumes the entire risk of any use it may make or permit to be made of the Information.

The MSCI ESG Fund Ratings is designed to assess the resilience of a fund's aggregate holdings to long term ESG risks. Highly rated funds consist of issuers with leading or improving management of key ESG risks.

- AAA, AA: Leader- The companies that the fund invests in tend to show strong and/or improving management of financially relevant environmental, social and governance issues. These companies may be more resilient to disruptions arising from ESG events.
- A, BB, BB: Average- The fund invests in companies that tend to show average management of ESG issues, or in a mix of companies with both above-average and below-average ESG risk management.
- B, CCC: Laggard- The fund is exposed to companies that do not demonstrate adequate management of the ESG risks that they face or show worsening management of these issues. These companies may be more vulnerable to disruptions arising from ESG events.

The Fund ESG Rating is calculated as a direct mapping of "Fund ESG Quality Score" to letter rating categories.

- 8.6- 10: AAA
- 7.1- 8.6: AA
- 5.7- 7.1: A
- 4.3- 5.7: BBB
- 2.9- 4.3: BB
- 1.4- 2.9: B
- 0.0- 1.4: CCC

The "Fund ESG Quality Score" assesses the resilience of a fund's aggregate holdings to long term ESG risks. Highly rated funds consist of issuers with leading or improving management of key ESG risks, based on a granular breakdown of each issuer's business: its core product or business segments, the locations of its assets or revenues, and other relevant measures such as outsourced production. The "Fund ESG Quality Score" is provided on a 0-10 score, with 0 and 10 being the respective lowest and highest possible fund scores.

The "Fund ESG Quality Score" is assessed using the underlying holding's "Overall ESG Scores", "Overall ESG Ratings", and "Overall ESG Rating Trends". It is calculated in a series of 3 steps.

Step 1: Calculate the "Fund Weighted Average ESG Score" of the underlying holding's "Overall ESG Scores". The Overall ESG Scores represent either the ESG Ratings Final Industry-Adjusted Score or Government Adjusted ESG Score of the issuer. Methodology for the issuer level scores are available in the MSCI ESG Ratings Methodology document.

Step 2: Calculate adjustment % based on fund exposure to "Fund ESG Laggards (%)", "Fund ESG Trend Negative (%)", and "Fund ESG Trend Positive (%)".

Step 3: Multiply the "Fund Weighted Average ESG Score" by (1 + Adjustment %).

The stated rating only applies to the Institutional share class and other share class ratings may differ.
