Disclosures

The Ecofin Sustainable Global Water UCITS Fund performance includes the effect of ongoing costs (including the management fee) which are capped at 1.6% per annum for institutional investors and 1.35% for Founder investors, whereas the S&P Global Water (Euro) Net Total Return Index (which provides liquid and tradeable exposure to 50 companies from around the world that are involved in water related businesses) and the S&P Global Infrastructure (Euro) Net Total Return Index (which is designed to track 75 companies from around the world chosen to represent the listed infrastructure industry while maintaining liquidity and tradability) do not apply a corresponding deduction for ongoing costs of a fund. (The performance of an index is generally presented on a total return basis, i.e., assuming reinvestment of dividends net of withholding taxes using the tax rates applicable to non-resident institutional investors.)

Neither the S&P Global Water (Euro) Net Total Return Index or the S&P Global Infrastructure (Euro) Net Total Return Index are specifically referred to in the Prospectus of the fund, and shall not be considered as a benchmark in the sense of the Benchmarks Regulation, and Ecofin does not give any representation or warranty with its fitness for a particular purpose in comparative performance.

None of the Information can be used to determine which securities to buy or sell or when to buy or sell them. The Information is provided "as is" and the user of the Information assumes the entire risk of any use it may make or permit to be made of the Information.

The MSCI ESG Fund Ratings is designed to assess the resilience of a fund's aggregate holdings to long term ESG risks. Highly rated funds consist of issuers with leading or improving management of key ESG risks.

- AAA, AA: Leader- The companies that the fund invests in tend to show strong and/or improving management of financially relevant environmental, social and governance issues. These companies may be more resilient to disruptions arising from ESG events.
- A, BB, BB: Average- The fund invests in companies that tend to show average management of ESG issues, or in a mix of companies with both above-average and below-average ESG risk management.
- B, CCC: Laggard- The fund is exposed to companies that do not demonstrate adequate management of the ESG risks that they face or show worsening management of these issues. These companies may be more vulnerable to disruptions arising from ESG events.

The Fund ESG Rating is calculated as a direct mapping of "Fund ESG Quality Score" to letter rating categories.

- 8.6- 10: AAA
- 7.1- 8.6: AA
- 5.7- 7.1: A
- 4.3- 5.7: BBB
- 2.9- 4.3: BB
- 1.4- 2.9: B
- 0.0- 1.4: CCC

The "Fund ESG Quality Score" assesses the resilience of a fund's aggregate holdings to long term ESG risks. Highly rated funds consist of issuers with leading or improving management of key ESG risks, based on a granular breakdown of each issuer's business: its core product or business segments, the locations of its assets or revenues, and other relevant measures such as outsourced production. The "Fund ESG Quality Score" is provided on a 0-10 score, with 0 and 10 being the respective lowest and highest possible fund scores.

The "Fund ESG Quality Score" is assessed using the underlying holding's "Overall ESG Scores", "Overall ESG Ratings", and "Overall ESG Rating Trends". The "Fund ESG Quality Score" is equal to the "Fund Weighted Average ESG Score". MSCI calculates the "Fund Weighted Average ESG Score" of the underlying holding's "Overall ESG Scores". The Overall ESG Scores represent either the ESG Ratings Final Industry-Adjusted Score or Government Adjusted ESG Score of the issuer. Methodology for the issuer level scores are available in the MSCI ESG Ratings Methodology document.

The stated rating only applies to the Institutional share class and other share class ratings may differ.
